The Universe The principle goal of education is one of the world's creation man, and of perfecting his. And we realize the importance of education. Generally Training can be divided into two kinds of religious education and non-religious education. Religious education is the deliberate and purposeful set of actions to educate the statement accredited to other people so that people practice a religion and its teachings seem to be committed and adhere.

It should be noted that non-Islamic education and religious education for all More than that, each religion may be educative but not Islamic. Any training that Jen has no religion, incomplete, and no apparent Durable. Islamic Education as Education Islam, the Quran, the Prophet (p.b.u.h.) and the Imams of the great coaches are not infallible.

Excellent the aim of education is the most heavenly human desires and instincts of self-refinement and adjustment to raise the human spirit and great intellect was his highest level of perfection. All prophets from Adam (AS) to Khatam (s) from the creator to were commissioned to lead humanity towards human perfection.

Every prophet was sent to confirm and complete previous religion and Islam is the complete And most comprehensive The ritual and religion as a category and the only religion is conveyed to humanity by The Imams and divine loving kindness distortions remain secure. Magnitude A certain books cementum other prophets would distort the faith and credit of the prophets and religion are not a stain of shame that people skirt and jobber of misleading and fictitious religions until the end of time has infected us, we believe in Unity theory and practice of all the Prophets, Islamic education in a variety of patterns and promote the needs of different communities.

Today Which are man-made pagan civilizations of East and West Common universe Each has features and benefits that are a lot of problems and losses They have too many people on the roads and paths of female representatives, tortuous and rugged They. This civilization; Although, the technique is the ability of humans Extensive But man has created a breeding That Which also provide for the maintenance and strengthening of the public and preserve the useful life Is short, and ethics and it is not considered spiritual and sometimes forgotten and this leads to backwardness and decline is being caused.

Because of the greatness and power of ancient Iran and nurture scientists and scholars for their great work on progress Works by European and American countries and they like Avicenna, Abu Rayhan Biruni and a university today they are taught We can study the fundamentals of traditional education remained the works of such contemporary works of Saadi, Ferdowsi, ... about We undertake study and training precious teachings that contradict religious teachings and We then extracted human needs today and in accordance with the Educators put at the disposal of age. We will be notifying all groups of children and youth with majesty and power of Iranian culture and civilization. Force arming young people with confidence in their build resistance against cultural invasion and instead entered the retail cultural baseless and vulgar diversion, such as the issuer of Islamic teachings and principles appropriate to our country.
