### ABSTRACT

Changes in the Qatar era of the most important periods of the history of Iran. The history of the land at this time was faced with a significant break. Break the traditional history of Iran completed and entered into a new period of construction. The beginning of a new era of European Nasser adding Shah Qatar had a total of three trips to Europe. The first foreign trip in the year 1290 BC and at the invitation of the Austrian Emperor Francois Hz first to visit the international exhibition Vine was done Nasser adding with a group of princes, courtiers and Mira Hasan khan generalissimo of Russia to Europe and to Germany, Belgium, Britain, France, Switzerland, Italy, Austria and the Ottoman Empire (Turkey) visited.

KEY WORDS: Travel - Europe - Shah - Qatar

### INTRODUCTION

Travel Nasser edit Shah Qatar had started several reasons. Some of the country's efforts to reform his entourage led them to think that they fall to the king of Western progress. For example, one of the initiatives Mosher dole to align the king to reform his trip to Europe was king. Abdullah Exchequer in his book, Moshir-ol Doleh motivation by stating that: "Moshir-ol Doleh to Europe with the intention of King takes the material and spiritual progress of Europe, the impact of legislative power in the countries of this part of the world has been made, to see and Rosalyn do not regret what has taken to implement it.

#### *Motivation of travel:*

Of course, this was not the only reason for traveling to Europe Shah. In the meantime, the Western countries sought to travel to their countries Shah, a place of civilization and progress to kill him and take this opportunity to get more points. It should not be a personal motive as well as luxury king neglected. Shah says the reason for his visit as follows: "The purpose of traveling to Europe to improve the planning and development issues, such as the army and munitions and Shaq etc. and is now in the future, and certainly necessary to improve troops on their Dummy counts. During this period he also Nasser edit Shah Qatar personal motives played a role. He wanted to win the friendship of England and from there to see the progressive civilization, decided to personally travel to Europe. In addition to Europe's infantile curiosity. If we take a glimpse of the results of the trip Nasser adding Europe, we must say that in the first and second trip to the little king urged to continue reforms. Rail construction, in printing machines, consolidate friendly relations with Russia, Germany, Austria, France, Austria and the formation of a military force in the style of Russian Cossack another way, the results of the first and second Naseredin Shah Qatar journey, but a journey third, progress and reform drive completely faded and the Europeans, especially the British monarch on the tour was a great privilege. During the visit, Toolbox with information about the amount and how to trade tobacco products with the help and agreement etemadsaltane Aminsoltan proposed dialogue and points of sale and export of tobacco from the Shah of Iran. Only gains the trip to the country, giving many concessions that were given to foreigners. Reforms that had begun before traveling to Europe encouraged. Shah was progressive in nature and wanted to make a series of reforms in administration and his Chancellor (generalissimo) is also a man of progressive and new fans of European civilization.

### *Results Shah Trips:*

Crowning its first trip to the construction of the railway in Iran. The shah back to Iran, Persian and Latin letters a printing machine purchased and sent to Iran. In the second visit of the Iranian friendly relations with Russia, Germany, Austria and France was greater strengthening of a weapons factory and the role of police in urban security that has resulted in the purchase of arms and the formation of a military-style force of Austria and another in a manner Kazakhstan, Russia and also in relation to the establishment of the police Department, discussions took place. Shah third trip capitalists exploit the oil reserves of English preparations were prepared. King with a wide variety of industries, ranging from war and Ghyrjngy huge balls to get to know small arms and military purchase orders received from them. The travel Toolbox with information about the amount and how to trade tobacco products with the help of Aminsoltan Atmadalstnh and agreed to discuss the proposal and points of sale and export of tobacco from the Shah of Iran. Malcolm Khan also Vary lottery drawing on the establishment of organizations in Iran and the income that could be derived from the state treasury and the privilege to speak at length with King and King with the privilege to request agreed. Shah third trip mostly hiking and recreation, and the only income that was awarded many privileges that were given to foreigners. Shah a total of three trips to the West (Europe time) there. In his first trip abroad in 1290 BC and at the invitation of the Austrian Emperor Francois Hz first to visit the international exhibition Vine was done. Shah, who along with a group of princes, courtiers and Mirzahoseyn generalissimo of Russia to Europe and from Germany, Belgium, Britain, France, Switzerland, Italy, Austria and the Ottoman Empire (Turkey) visited. But what is in the eye of the viewer travels easily cost a lot of these trips were found. King's easygoing nature demanded for his trip was full of dignity, so his laborer kitchen and pantry, the initiative and had the opportunity to travel came here to complete. High cost of these trips a huge load on the shoulders of the people. Money it depends on the national income resources such as customs administration was providing. Moshir-ol Doleh and people like him will soon see the results of their trips to the West King "Shah trips to Europe and to examine the state of governance in Europe, he has started to continue reforms that before traveling to Europe, the urged. Although the first and second trip to Europe in order to acquaint him with the Shah West advances and the desire of the king to reform, but the motivation was the third trip. The visit of the Shah's last trip abroad Aminsoltan and coordination efforts, he was British. British visit of the Shah received high scores and he also was submerged in the West and According to its own markets and boost trade and economic activities of the British railway and tram warm compress and points, shipping Karun River, the establishment of the Imperial Bank, highway Ahvaz to Tehran, lottery and handed them the energy and imagination perform basic raw masterpiece.

### *The result:*

It became apparent that the only way to travel to Europe Shah was the king's personal interests and no outcome other than the imposition of rates and contracts on the shoulders of people Unhand disgraceful. The rates of other adverse effects, and it was also great and more importantly, the presence of the foreign nationals inside and outside Shah unprecedented opportunity to quickly communicate with each other. So concerned for the kingdom's throne and holding soil in their country of external threats, it was natural that the objective of all foreigners risky inevitable for social stability and political continuity is considered. Almost from the beginning of the reign of King believed in appreciation to their nationals being able to learn the secrets of new technology, and it is considered that it was intensifying. All his fascination with the West and with all the self-study of consecutive hours reading boring text writers and geographers, as if his inner traditionalism people only saw the artisan and tradesman work. People who can only work hard and do the profession fathers of the old Criteria recant. King trips will not only change his view about reform, but King was suspicious to them. Impose a great cost to travel on the shoulders of the people and the conclusion of contracts and concessions that Shah thought the boom led to a wave of discontent among the population of the country was formed. In one of his poems Shah Mira Aqua Khan Kerman is to blame. Shah also led expeditions to import more and export less to the country. The influx of consumer goods and luxury markets soon of domestic industries be set aside and seize the market, and a wave of disappointment in the country's manufacturing industry saw their match against foreign goods. Russian and British governments will pressure the Shah of Iran's pro-poor and non-performance, and also because of corruption and undermining the court, amendments to forget and even to be pessimistic This pessimism has so much that not only did other European trips, but others banned it. He wrote to his opposition to foreign trips saying that Iran's very bad for this kind of places open. If you do not stop after the ten thousand ten thousand would go to Europe to see the bad effects will be too much.
