After attack of Mongolians in Iran, there wasn't any integrity government. Local government was worse the condition of irregular and trouble. Until it was changed by enter Hulagu and after it, Ilkhanid’s government was established in Iran short periods of Ilkhanid government is one of the though full period in Iran history, because in this period, they were susceptible of intrigue and plot and they were to opportunity to destroyed their competitors. We can say Iranian ministries were possessed of Ilkhanid’s support. They succeed by their supports of course there were some struggles among them. In generally we can say that this period was intense period and this article had been paid to descent and top of ministries in this period from Hulagu to Abu saed.Ministers is the main offices in Iran history that it was remained by its power and importance by attack of Mongolian in 616 B.C to Iran.by constitute of ilkhanid government in 654 B.C by Hulagu, so the Mongolian had power.Deployment of Ilkhanid’s in Iran was caused to evolution and control the government and politic so, they use of Iranian Just and award officials and different methods to govern the government. And by help of such teachers and ministries they were auctioned to control the govern affairs. Since entered Hulagu to Iran, the ministers was on seif odin Bitchi that there wasn't evident in information references.He was ministers to 661 B.C and after his dead, the ministers was gave to khajeh shams oldin joveini. (khand mir 1963, 96/3)Attention of shams odin Joveini to official affair in Iran had more effect on disorder situation of Iran. He could controlled on governmental works.(Rashid odin Fazollah 1997, 734/2).He at first start to gathered the scholars and scientist and appointed them to main works. He motivated the writers and poets. This works were caused to far from disappointment of scientist and scholars. (Bayani: 1996, 181-180).Sham Odin was the minister and first person of government in last period of Hulagu and in all period of reign of his to boys (Abagha and Ahmad tekodar).

The periods of Ilkhanid’s government in which they were inheritor of Mongolian chengiz khan's government was descent and top period but present of teachers and Iranian ministers was more important.And we can say control the all affairs was by help the ministries, in this period, ministers had significance role in control the government affairs. He controls the works in ministers and politics and economics affairs. And he helped to all works to Ilkhanid and he was on top of works but sometimes in beside he, another person was inductee in which he control the financial a works. And had a "official master" name. (spuler: 1996,283-284).In fact, there wasn't much different among ministers of government and official because Ilkhanid’s was separated the financial affair and gave them to officials.The present of two simultaneous ministers in government system was a something in which different this period with another periods.in period of shams odin Joveini ministers, Majdolmolk yazdi had name of Moshref olmamalek and he paid to control the works in government as Joveini signed the right side of letters and majd olmolk assigned the left side.(Lambton 1982, 65). We can say in this
period, the ministers had more wealth as another period. Some ministers had May farms lands and even their children and their family helped to done the works in government. Shams odin Joveini wasn't exempt of this rule though history author told that "the income of assets khajeh shams odin Joneini had been one tooman". (Mostufi 1974, 593). This Jealous was motivated the competitors. Majd olmolk was one of his competitors and started to intrigued against him and this work caused to his heath but, by. Reigned Arghun , the situation of Joveini was changed and then shams odin Joveini was dead in 683 B.C (khaneh Amir: 1965, 294). Still, official master and ministries tried to control the government but Ilkhanid’s were malicious to them by little errors or problem. We can say this is one the weak in their governing and another problem in this period was collective ministers that Ilkhanid’s were appointed to ministries for control the government that they controlled the government system as collective. And this caused to more implications and problems. After shams odin Joveini, Amir Boogha by name ching sung (grand ministers) incumbent the government affairs. (mir khand: 1990,1171/5), he selected Jalal odin mokhlles semnani as his vice and gave the office public works to him. (Ayati 1993,129). but, by eliminated Jalalodin semnani and reigned saad oldoleh yahood, the period of Amir Boogha was finished. And it assigned to Saad olodeled. (Monshi kermani 1972,126), he came to court as doctors and when he showed his ability he could arrived to ministers. So, he could create order in financials works and prevented from robber's people in belongings (Groseh: 1999: 608), thus, gradually the influence and validity of him were more and he hardened to Muslims and called Chengiz and Arghun as prophet and Arghun wanted to changed his prophet and called Khaa a to house ido.and even he wanted from sadrodn zanjani that accepted the prophet of Arghun and then had been decided to his death. (Ayati: 1993,129) by death of Arghun and reigned Geykhatu, the financial affairs were worse and in this time, Ahmad khalidi zanjani was selected as official and gave the name sadre jahan to him. He suggested that paper money (chaow) had been published. (Rashidu : 1973,162). This money was rectangle shape and written the shahadatain and name Mongalian Geykhatu and its amount and "world king in date 693 sent this chaow to government". So, the chaow wasn't continued much time and it was fronted to people's reactions and by people protest of Shiraz and Tabriz, Geikhatu ordered to gathering this chaow. Of course, the name of (place of chaow) had remained in Iran as press. In fact, it might be had a disorder situation in government system for many reasons:

First that Geykhtu was a swinging person and didn’t had pay attention to finance and by his granted and gifted was caused to robber's people in belongings. When Ghazan were reined, Sadre Jahan was deposed and Jamal osldin dastjerdani instead him was appointed, but it wasn't continued to yaser. (khand mir 1965, 313) and sadra Jahan arrived to ministers again but by court's verification Ghazan was agreed to his kill and Yaser was appointment (Pir niya 2001,563) can say that the financial decline wasn’t only particular to Mongolian period and even the government after and before of Mongol were susceptible financial decline. Of course, the hedonism and spree of Mongolian were interference in this matter. Because the Mongolian hadn't any in formation and politic in relation of governing and their last life was migration and reigned, thus after the kill of sadr Jhan by order of Ghazan, saad odin savoji arrived to official and by cooperation of khaJeh rashid Odin fazallah started to control the government situations. (Rashid odin fazallah 1929,134). But in period of Aljative, by in influence of Taj oldin Alishah, the broker of jewelry, savoji was scared and stated to humiliated him. But Rashid odin was respected to Tajodin Alishah and then they started to struggled with each other. and finally by order of AlJative, savoji was assigned to government (Alghashani: 1994, 122-123) After death of Aljative in 716 and reigned Abusaid, the opportunity was start to tajoldin Alishah to plot against khajeh rashid odin and he could deposed khajeh. And in 718 they could killed khajeh in around Tabriz. (rajab zadeh 1965, 22-23): after deposed and killed Rashid oldin fazollah, was gave to taj oldin Alishah, until he was ill in 724 and he died. (Mostofi): we saw Ilkhanid’s killed ministries gruesomely expect tah oldin Alishah in which he was first person that died for natural dead. After his dead, roknedulleh saen was reigned to ministers. He was raise by Amir chowan but he stared to disparaise him with Ilkhanid’s, of course should be say in this time, the power was Amir chowan and his son damesgh khan and ilkhan was king formally. (khanem Amir: 1965,323): the ministers of rokoldin finally by his death was finished. By his death and decline the power of chowanian, Abosaid was gave ministers to ghiyas oldin abne Rashid oldin. (Mostofi 1974, 621). Ghiyas alldin was control the ministers to last life of Abu saed. Abu saed was hoped to his selected until he could organized the bad situation of financial and he was partly success but there wasn’t quantitative opportunity because by death of Abusaaad, the government of ilkhan was decomposed and the financial organizations so were destroyed.

Conclusion:
By considering the ministries of ilkhanid period we found that Mongolians were used from Iranian ministers for control the government and ministers as highest level was reigned Iranian, in which some of these ministries had vast authority and supported by Ilkhanid and this was caused to advantage of recessive people and it was followed by Jealous and competition of ministries and grand of countries and it was caused to many problems and finally it was cause to killed one of them. but, this was an opportunity for Iranian to try to
regeneration the culture and by follow the activity of our ministers, Mongolians had been Muslims and they forgotten their rangy life and try to culture and prosperity of Iran.
